

THE GUN TOOL™

USER GUIDE & WARRANTY

CONGRATULATIONS! You own the world's #1 multi-tool for rifles and shotguns. The Gun Tool is equipped with the 18 tools you need most to maintain long guns in the field: a variety of Torx® and Allen® wrenches, four magnetic hex drive bits, a stout claw-point blade for ammo boxes, a pin punch for trigger disassembly, and a choke wrench that fits most choke tubes and doubles as a scope windage/elevation adjuster. This is no generic handyman multi-gadget – The Gun Tool is built for a shooter's specific needs. No tool fits you better.

PIN PUNCH: Check the fit of the pin punch to receiver pin diameter before applying pressure. Never hammer on this tool to remove a stuck or jammed pin. The gun pin remover DOES NOT LOCK and can slip or fold under heavy or off-camber pressure. If you are unable to remove a gun pin, apply penetrating oil, wait 30 minutes, and try again. If you are still unable to remove the pin, take your gun to a gunsmith or use a traditional gun pin punch and hammer. To avoid damage to your firearm, do not apply excess force to this tool.

TORX/ALLEN WRENCHES: Check torque specs with your gun manufacturer before applying pressure to fasteners. If you cannot remove a fastener, lubricate threads with penetrating oil, let stand for 30 minutes, and try again. Use caution to avoid damage.

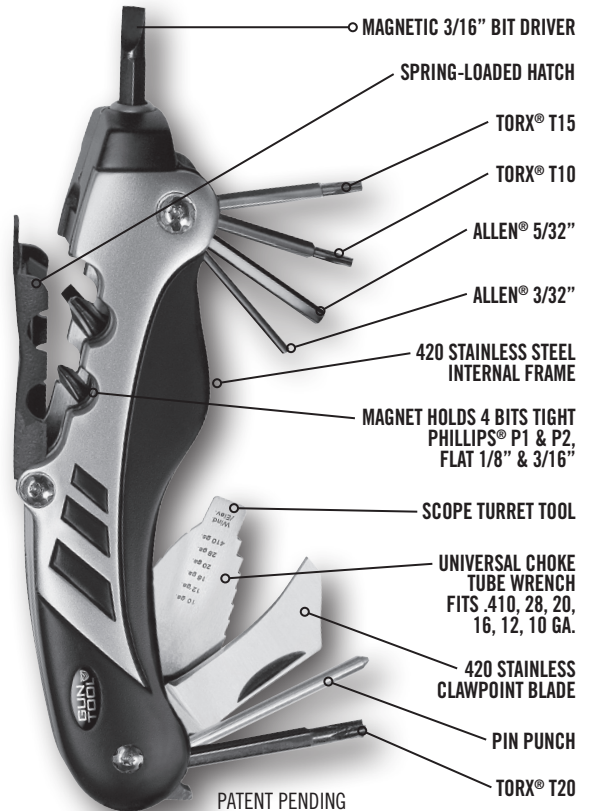

CHOKE TUBE WRENCH: The choke tube tool fits most shotgun chokes. Because of the wide range of gun makes, models, and choke constrictions, check the fit carefully before exerting pressure. Never try to remove a stuck or embedded choke tube with this tool. When inserting or removing a choke tube, maintain a sightline where the tool meets the choke tube.

BITS, MAGNETIC DRIVER, STORAGE BAY: To avoid damage, do not open the spring-loaded hatch beyond 90°. Align and seat bits in holding slots for secure storage. Before use, ensure a tight fit of the bit to the screw head to avoid stripping heads. Do not apply extreme pressure to remove stuck screws. Use a toothpick, brush or compressed air to remove any debris from magnetic driver or storage bay. To order replacement bits, visit RealAvid.com.

CLAW POINT BLADE: The knife blade DOES NOT LOCK and can close unexpectedly with misuse. The claw point blade is designed for medium pressure cutting, such as opening ammunition boxes, and is extremely sharp. Use caution before, during and after use to avoid injury or accidental closure. Never exert pressure to the back of the blade while in use, and direct sharp point and edges away from yourself and others. Do not pick up or hold The Gun Tool by the blade at any time. Re-sharpen the blade with a carbide or ceramic sharpening blade only, following the sharpener manufacturer's instructions for the proper procedure.

SAFETY: It is your responsibility to exercise caution in the use of this tool, especially when using the knife blade. Always direct points, edges and cutting strokes away from yourself and others. The knife blade and other implements DO NOT LOCK and can suddenly close with improper use. Use extreme care to avoid accidental closure. Do not expose more than one implement at a time, and fully close each implement after use. To avoid injury or damage to your firearm, check fit of tool before use. Do not apply extreme leverage to your firearms with any Gun Tool implement.

CARE & MAINTENANCE: Your Gun Tool should be cleaned, dried and re-oiled periodically. Clean with a mild solution of detergent and water, dry thoroughly, and oil pivot areas with a lightweight machine or penetrating oil. Avoid getting oil on side bolsters and remove overspray or spillage. Note that the knife blade is made of corrosion-resistant stainless steel, but no stainless steel is rust proof. If spots or stains appear, remove with a non-metallic abrasive pad and wipe with penetrating oil.

WARRANTY

WARRANTY: Limited – 3 Year Warranty: The Gun Tool is guaranteed free of defects in materials and workmanship for three years from date of original purchase. Real Avid will replace or repair any product that proves defective upon our inspection. Use of The Gun Tool for anything other than its intended gun-maintenance purpose is considered misuse and voids this warranty. For warranty service, send the product, shipping paid, along with an explanation of the defect, as well as your name, address and phone number to the address below. This warranty excludes damage resulting from deliberate or accidental misuse. Warranty does not cover rust, stains or corrosion, or normal wear and tear. Repair or replacement is the exclusive remedy under this warranty. Real Avid, its partners and affiliates are not liable for incidental or consequential damage resulting from use. Some states do not allow exclusion or limitation of incidental or consequential damages; therefore, the above exclusions may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.

TO FRIENDS AND CUSTOMERS: As the owners of Real Avid, authenticity isn't just a strategy here. It's a guiding philosophy. It arises out of our faith and personal relationships with Jesus Christ. We know that our creativity and success ultimately comes from Him. He cares about each of us and about our customers. We're not perfect, but we are committed to following Him in our personal and business lives.

We look forward to growing our relationship with you and continuing to earn our place.
