

PISTOL TOOL™

USER GUIDE & WARRANTY

ABOUT THE TOOL: The Pistol Tool's unique design allows for quick visual and physical access to each of its one-hand-operational implements. When opened completely, these implements will lock in place using a liner lock system. To disengage the liner lock, simply push it towards the center of the tool and close the corresponding implement. Make sure that only one implement is opened at a time. Before opening another implement, the first implement must be closed.

PIN PUNCH: During use check fitment of pin punch to all pin diameters before applying pressure. The pin punch is threaded to the tool with standard 8-32 threads. The pin punch may be removed which allows the tool to be used with other common gun cleaning accessories with 8-32 threads. If necessary, the pin punch can be unthreaded and lightly tapped with the tap hammer at the end of the tool to ease a snug pin in or out of its location. Never forcefully hammer on this tool to remove a stuck or jammed pin.

PICK / SCRAPER: The pick / scraper is made from a non-hardened stainless steel casting. Though the material has not undergone extensive hardening, this does not mean that it cannot scratch your firearm. Please use caution to avoid damaging your firearm.

1911 BARREL BUSHING WRENCHES: The barrel bushing wrenches are designed to fit both Government and Officer model 1911 firearms. The wrenches are made of an engineering resin which is ultra tough but non-marring. When using the wrench make sure that the muzzle is oriented correctly and that the muzzle face is pressed flat against the surface of the wrench. The opening between the wrenches also makes an excellent mount for a carabiner if desired.

BIT DRIVER / METAL FILE AND BITS: The Pistol Tool's bit driver is hardened to give strength and longevity to its accompanying metal file. The bit driver must be opened 180° and locked before use. The bits have a black oxide coating for protection, and utilize ball detents for a secure fit.

HEX KEYS: The Pistol Tool is equipped with four Bondhus Protanium® hex keys to adjust a variety of laser sights and other small accessories. These are strong, accurate and made in the USA.

The set of four includes: .0625", .050", .035", .028"

KNIFE BLADE: The tanto blade is designed for high performance cutting. It is great for daily use as well as opening ammunition boxes, cutting rope and even trimming cleaning patches. Only re-sharpen the blade with a carbide or ceramic sharpener following the sharpener manufacturer's instructions. Like many of the implements this blade has a gray titanium coating which adds to its rust resistance and hardness.

PISTOL TOOL™

USER GUIDE (CONTINUED)

SAFETY: Before using any of the Pistol Tool's gun-related implements on a firearm, you must **MAKE SURE THAT THE FIREARM IS UNLOADED AND SAFE** to work on. It is your responsibility to exercise caution during the use of this tool, especially when using the knife blades. Always direct the points, edges and cutting strokes away from yourself and others. It is your responsibility to ensure that every precaution is taken when using this tool.

Do not deploy more than one implement at a time, and fully close or store each implement after use. To avoid injury or damage to your firearm check fitment of the pin punch before use. Do not apply extreme leverage to any of the Pistol Tool's implements.

CARE & MAINTENANCE: Your Pistol Tool should be cleaned, dried and re-oiled periodically. The titanium coating on the exterior of the implements and side plates makes an excellent rust inhibitor as well as a surface hardener, however this tough surface still requires maintenance to avoid damage. Clean with a mild solution of detergent and water, dry thoroughly, and oil pivot areas and metal surfaces with a lightweight machine oil or non-volatile penetrating oil. Avoid getting oil on polymer side plates and remove overspray or spillage. Note that the implements are made of corrosion-resistant stainless steel, but no stainless steel is rust proof. If spots or stains appear, remove with a non-metallic abrasive pad and wipe with penetrating oil. Like any other knife, the blade of the Pistol Tool will require sharpening occasionally. If you are inexperienced or do not feel comfortable with sharpening please do not attempt it. If necessary, please contact a local professional for assistance.

WARRANTY

WARRANTY: Limited – 3 Year Warranty: The Pistol Tool is guaranteed free of defects in materials and workmanship for three years from date of original purchase. Real Avid will replace or repair any product that proves defective upon our inspection. Use of the Pistol Tool for anything other than its intended purpose is considered misuse and voids this warranty. For warranty service, send the product, proof of purchase with shipping paid, along with an explanation of the defect, as well as your name, address and phone number to the address below. This warranty excludes damage resulting from deliberate or accidental misuse. Warranty does not cover rust, stains or corrosion, or normal wear and tear. Repair or replacement is the exclusive remedy under this warranty. Real Avid, its partners and affiliates are not liable for incidental or consequential damage resulting from use. Some states do not allow exclusion or limitation of incidental or consequential damages; therefore, the above exclusions may not apply to you. This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.

TO FRIENDS AND CUSTOMERS: As the owners of Real Avid, authenticity isn't just a strategy here. It's a guiding philosophy. It arises out of our faith and personal relationships with Jesus Christ. We know that our creativity and success ultimately comes from Him. He cares about each of us and about our customers. We're not perfect, but we are committed to following Him in our personal and business lives.

We look forward to growing our relationship with you and continuing to earn our place.
