

# BORE-MAX™ SPEED JAGS™ & PATCHES

HANDGUN

## FASTER RESULTS. LESS EFFORT.

Speed Jag and Speed Jag Patches are sized exactly to work in tandem delivering precise bore fitment by caliber, resulting in the removal of up to 2 times the copper and carbon of shorter traditional jags and square patches. This means a cleaner bore with less pass throughs.

**PATENT  
PENDING**

### CLEAN BORES FASTER

RIFLE SPEED JAG & PATCH – 2X MORE PATCH CONTACT = 2X MORE SURFACE CLEANED

.45 CAL

THE BORE-MAX™ SPEED CLEAN SYSTEM™ IS  
PRECISELY SIZED FOR MAXIMUM BORE CONTACT.

SPEED JAG PATCH™ - 2X MORE BORE CLEANING CONTACT

**WARNING: DO NOT  
USE SPEED JAG WITH  
TRADITIONAL PATCHES**

Speed Jag™ and Speed Jag Patches are sized exactly to work in tandem delivering precise bore fitment by caliber. As a result, use of any other patch or jag with Bore-Max Speed Clean System components may result in the jag getting trapped in the bore.

**ONLY USE** Speed Jag Patches with the corresponding Speed Jag.

**DO NOT USE** Speed Jag Patches on regular jags.

**Always make sure your firearm is unloaded prior to cleaning.**

1. Add Bore-Max™ Foaming Bore Cleaner to your bore at the breach. Point muzzle slightly downward (let it work for 10 – 15 minutes).
2. Use Bore-Max Speed Brush™ to vigorously scrub the inside of the bore, breach to muzzle, to agitate the fouling.
3. Drape Speed Jag Patch™ over Speed Jag™ evenly, ensuring it covers the jag on both sides.
4. Run Speed Jag and Patch through the bore (breach to muzzle). Continue repeating this step with a fresh patch until the patch is clear of fouling residue.
5. Fouling is removed in layers, so repeat steps 1 through 4 until all fouling is clear (indicated by a clear patch on the first pass in step 4).

**⚠ WARNING:** This product can expose you to chemicals including Nickel (Metallic), which is known to the state of California to cause cancer and birth defects or reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).
